### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance.

The most relevant prior art is that of Kiehne (U.S. 6,629,985), Herbert et al. (U.S. 5,868,771), Landis et al. (U.S. 5,676,677), Williamson (U.S. 2,280,463), and Frasseti (U.S. 5,116,351). Kiehne and Herbert et al. disclose scalpels that include an attachment hole on the blade meant for attaching the blade to the handle. Both devices have blade guards with arms that can engage the blade. However, neither invention discloses or fairly suggests two holes besides the attachment hole that are engaged by the guard arms. Williamson, and Frasseti disclose cutting instruments with locking holes configured to engage a locking boss on the blade guard. However, neither invention discloses a second hole that is also engaged by the blade guard. Finally, Landis et al. discloses a cutting instrument with a plurality of holes on the blade and a blade guard with pins that engage these holes. However, Landis does not disclose or fairly suggest having a retaining arm and retaining hole in a non-arcuate shape. A non-arcuate shape would be unfavorable, as it would not improve the sliding of the arm within the hole and into locking sockets (24 and 26). Additionally, slight pivoting is necessary as only the end hole has locking sockets and therefore the proximal end of the blade guard is slightly pivoted in order to disengage the pivots since the other holes do not have the slots.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
